# about

Do you like being surrounded  
by nature and foliage?

If so, tropical wallpapers are a good alternative, as it gives off the illusion of living among the greenery, which also proves to be beneficial towards humans to be one with nature.

Turn your interior into a *paradise of green*, and immerse yourself in a summer vacation with tropical style wallpapers. Our designs range from banana tree plants, exotic fruits and animals, butterflies, palm leaf, colourful parrots, various ferns, root plants, wildflowers, and more. We even have them in different color tones

The background is a complex collage. At the top and bottom are horizontal bands of a dark brown pattern featuring golden-brown tropical plants like palm trees and ferns. A large, light beige rectangular area occupies the center. At the bottom of this beige area, there is a framed photograph of a lush green jungle scene with various plants and a small white structure. Overlaid on the bottom right of the entire page is a piece of torn, light brown paper.
